

The Estate Planning Trust

The Protection Is Forever

Like most people, you have probably set aside money designed to be inherited by **family members, loved ones, and / or a church or charity**. However, because of the **risk of nursing home and long term care**, these funds may never go where you intended them to be. **Nursing homes cost \$ 72,000 a year.**

The Estate Planning Trust is designed to safeguard assets from nursing home costs. By placing funds into the trust the assets are changed to “uncountable” for Medicaid eligibility purposes after 60 months. Planning in advance can assure that the money you have designated for your desired beneficiaries will pass to them without delay by avoiding probate.

The Estate Planning Trust allows you to place \$5,000, \$10,000 even \$50,000 per person in a place that **provides you the peace of mind the asset is protected and will go where you desired it to be at your passing.**

Creating your legacy could never be easier than the Estate Planning Trust.

There are no attorney fees, trustee fees or set up costs and you cannot be denied coverage.
